

HRS PSL Showcased at International FoodTec India 2015, New Delhi

PRESS RELEASE - OCT 29, 2015 12:03 EDT

HRS Process Systems Ltd. (HRS PSL), part of HRS Group, UK participated in the 10th International FoodTec India 2015 from 14th- 16th Sept, 2015 at Pragati Maidan, New Delhi.

Pune, India, October 29, 2015 (Newswire) - HRS Monobloc Sterilizer is used for processing of various pulpy products like Mango, Guava and Tomato. This was developed with a thorough understanding of seasonal fruit availability, heat sensitive product processing and retaining natural flavor and taste. This system allows integration with pre-heaters, pasteurizers and is designed to process upto 12,000 kg per hour of fruit pulp/ puree concentrate of high viscosity and comes with aseptic filler for bag-in-drum filling mechanism.

HRS UHT Sterilizer , developed specifically for dairy & beverage applications, is based on the principle of ultra heat treatment sterilization. The system ensures desired heating cooling temperatures, product holding times and enables further input to desired packaging line. UHT treatment to products can give increased shelf life at ambient temperature when aseptically packed.

Both products have received a very good response and owing to their superior technology have generated interest with well known multinational and Indian food companies including Varun Beverages, Parle Agro, Schreiber, Jadli Foods, Leon foods, and many more.

The total food production in India is likely to double in the next 10 years with the country's domestic food

"Cutting edge technology will play a dominant role in ensuring high quality standards for the end product and reduced cost of production. HRS has established its credibility
