

HRS proves to be a technologically superior brand at P-Mec 2018, Noida, India.

HRS Process Systems Ltd recently participated at Asia's biggest pharmaceutical industry related show P-mec 2018 which was held at India Expo Mart, Greater Noida, Uttar Pradesh on 12th to 14th December 2018. The show was organized by one of the leading exhibition organizer UBM India Pvt Ltd.

The Indian pharmaceutical industry is constantly looking towards high quality, low cost and precision in manufacturing technologies to sustain their product quality and effectiveness. P-mec is an international exhibition on pharmaceutical and medical devices and their accessories. This event gives boost to explore latest innovation, ideas, trends and products in the pharmaceutical market.

HRS showcased its energy efficient range of heat exchangers and skid mounted systems which are used for various applications like heating, cooling, condensing, re-boiling, recuperation, CIP, WFI, etc. Our flagship product ECOFLUX* corrugated tube heat exchanger and its range of models, HRS FUNKE Plate heat exchanger and HRS hot water systems are compact and energy efficient, thus play an important role to enable better process cycles and subsequent payback for pharmaceutical, healthcare and allied industries. Our expertise to design and manufacture heat exchangers in exotic material has proven further beneficial to these sectors to enable better process fluid compatibil-

ity which is extremely critical for many applications.

At P-Mec, we have also shared with customers our capability to provide nutraceutical, UHT and similar pilot as well as turn-key plants helpful to fulfill processing requirements of sensitive products such as Infant Food, Probiotics, Nutraceuticals and health supplements. To HRS PSL, P-MEC India gives an

opportunity to acquire new customers, strengthen existing customer relationships and develop new markets and prove benefits of our innovative heat transfer technology to pharmaceutical industry.
