

Innovative Heat Transfer Solutions

HRS Process Systems Ltd, is part of the UK based HRS group, an established name in the field of innovative heat transfer solutions. HRS Group is globally known for providing energy efficient range of heat exchangers and heat exchanger based systems. They are equipped with a strong network all across domestic market and easy reach for international markets like UK, Spain, USA, Australia, New Zealand and Malaysia to fulfill technology needs of process industries. HRS PSL is ISO 9001:2008 certified company and accredited ASME 'U' stamp in heat exchanger design and manufacturing, with a state-of-the-art facility near Pune, India.

Their focus continues to be in the key growing segments of pharmaceutical, chemical, fertiliser, agrochemical, steel, cement and such sector. At the same time, they are one of the key suppliers of technology for fruit and beverages processing, dairy nutraceuticals, diced and prepared food, etc. Their innovative range of ECOFLUX* corrugated tube heat exchangers, shell & tube heat exchangers, HRS FUNKE plate heat exchangers, Hot water systems, UNICUS scraped surface heat exchangers, systems for food processing and evaporation application processing solutions are required across the industry spectrum. They are

strategically engaged in R&D for advancement and facility expansion to cater to the growing market demand for our products and services across the globe. Their product portfolio is being enhanced to take care of complete process plant requirement and they are already executing some projects for Mega Food Parks and beverage processing.

Their design and manufacturing expertise enables them to offer equipment in stainless steel and exotic materials such as hastelloy, Alloy 20, Inconel, Monel, Duplex, etc. thus making them a trusted technology partner for process industries.

HRS, truly is a one-stop-shop for all your heat exchange requirement!
